Sizing guide

How to Measure for a Padded Hip Belt

To ensure proper fit and best performance, always select the padded belt size that best fits the user. When working with the Evoflex, consider adding Belt Extenders if longer straps are needed to reach the desired mounting point (see right).

Determine the correct belt size for the user:

1. Based on clinical goals, use arms to place user in desired position and determine the most effective position and angle for the belt.
2. At the selected belt angle, measure the distance over the body with a flexible tape to find the optimal length for the belt's padded section.
3. In the sizing table for your belt style, refer to Column B to find the appropriate belt size based on padded length. If user is between sizes, consider factors such as growth, weight variations and clothing changes. For proper fit and function, pads should not extend past the user's body.

Two-Point and Four-Point Padded Hip Belts

Size	A	B	C	D
S32	2.5cm (1")	32cm (12-1/2")	4.5cm (1-3/4")	117cm (46")
S38	2.5cm (1")	38cm (15")	5cm (2")	117cm (46")
M36	4cm (1-1/2")	36cm (14")	5.5cm (2-1/4")	130cm (51")
M40	4cm (1-1/2")	40cm (15-3/4")	5.5cm (2-1/4")	142cm (56")
M46	4cm (1-1/2")	46cm (18")	5.5cm (2-1/4")	142cm (56")
L62	5cm (2")	62cm (24-1/2")	7cm (2-3/4")	155cm (61")
L82	5cm (2")	82cm (32")	9cm (3-1/2")	206cm (81")
L92	5cm (2")	92cm (36")	10cm (4")	206cm (81")

Leg Harnesses

Measure from the anterior superior iliac spine (ASIS) to the point where the inner thigh touches the seat.

Size	Fit Range
S	20-28cm (8-11")
M	28-36cm (11-14")
L	36-41cm (14-16")

Webbing width for all belts: S= 2.5cm (1"), M= 4cm (1-1/2"), L= 5cm (2"). For padded belts, numeric portion of belt size equals padded length in centimeters; e.g., M46 has 4cm (1-1/2") wide webbing with 46cm padded length.

Additional Instructions for the Evoflex®

Determine total length needed for mounting:

1. At the selected belt angle, measure from the mounting point on one side across the user's body to the mounting point on the other side.
2. In the Evoflex sizing table, refer to Column D to find the maximum mounting length for the selected size belt.
3. If belt will not be long enough to reach the mounting points, Evoflex Belt Extenders can be used to add up to 12.5cm (5") per side. See the Evoflex + Belt Extender table below for maximum combined length. Both the Evoflex and Belt Extender can be cut to length if needed.
